Reference for Barnaby Row

As a tutor in the design studio and module leader in the architectural degree at Oxford Brookes University, I worked closely with Barnaby during the third year of his degree in architecture.

Barnaby demonstrates uniqueness in his approach to design. He is talented and finely articulate in developing considerate design work. His background and experience has a natural expression in the work he produces which is well refined and sophisticated.

Throughout the various design briefs, Barnaby developed his own style and personal response to his spatial proposals. He is a talented designer and someone who will truly flourish in architecture.

As a person he is a joy to be with and I have observed his relationship with peer colleagues where his presence has fully enriched the team as a whole.

I truly recommend Barnaby for a Masters in Architecture.

Ricardo Assis Rosa, ARB FHEA
Senior Lecturer in Architecture
Teaching Fellow
